Vijay Kumar Srivastava Senior Software Engineer – Tech Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Seasoned Full-Stack Developer with over five years of hands-on experience in modern web technologies, delivering production-grade solutions for enterprise clients. Recognized as Developer of the Quarter for pioneering a high-performance React architecture. Adept at leading small engineering pods, mentoring junior members, and driving continuous improvement through rigorous testing, CI/CD pipelines, and AI-enabled product capabilities.

CORE COMPETENCIES • Frontend: React, TypeScript, JavaScript (ES6+), Component-based design, Responsive UI, Accessibility best practices (as applied in production). • Backend & APIs: Node.js, Django, Python – designed RESTful services and integrated complex third-party widgets. • AI & LLMs: Integrated Large Language Models using LangChain and Generative AI APIs for automated data processing. • Testing & Quality: Cypress, Playwright, automated unit tests, 80%+ coverage enforcement, peer code reviews. • DevOps: Git, Jira, CI/CD pipelines, version control, deployment stability practices. • Leadership: Agile pod leadership (4 engineers), sprint planning, technical documentation, impact assessments.

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida | Senior Software Engineer (Dec 2024 – Present) - Architected a greenfield Insurance module, establishing frontend standards for core business workflows. - Executed performance refactor: segregated global Redux state from local Context API, reducing LCP to 2 s and INP <100 ms. - Guided a 4-engineer pod through Agile ceremonies; translated product requirements into technical epics and sprint tickets. - Maintained >80% automated test coverage across iterations, coordinating QA and feature development. - Modernized testing stack: migrated legacy Cypress suites to Playwright while retaining stability. - Delivered comprehensive documentation and impact assessments for production releases.

Ksolves India Ltd., Noida | Software Engineer (Dec 2020 – Nov 2024) - Developed React-based integration widgets for Microsoft Teams, GSuite, and ServiceNow, ensuring seamless data sync via Redux/Context API. - Built robust Node.js APIs to support low-memory footprint and high-throughput interactions with host environments. - Created responsive cross-platform mobile interfaces using React Native; integrated RESTful services and third-party authentication. - Implemented end-to-end debugging and performance tuning across varied device dimensions.

Key Projects - **MindFul Scrolling (Digital Wellbeing App)** – Designed Android application with Kotlin, Jetpack Compose, coroutines, and system APIs for real-time foreground app tracking. - **Sports Betting Simulator Engine** – Developed high-throughput simulator using React.js frontend and FastAPI backend with WebSocket streaming. - **Gen-Box LLM**

Integration – Spearheaded integration of large language models via LangChain to automate complex query resolution.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (2020) Diploma, Information Technology, Board of Technical Education Uttar Pradesh

CERTIFICATIONS & TOOLS - Git, Jira, VS Code, CI/CD, Cypress, Playwright. - Familiarity with Docker/Kubernetes and .NET stack – exposure through project architecture discussions.
