Vijay Kumar Srivastava Target Role: Senior AI Engineer – LLM & Backend Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Senior Software Engineer with over four years of experience in full-stack development and a recent focus on large language model (LLM) integration, backend API design, and real-time data streaming. Proven ability to architect scalable solutions using Python, FastAPI, and LangChain for prompt orchestration, while maintaining high code quality through automated testing, rigorous peer review, and Agile delivery.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Frameworks & Libraries: React, React Native, Node.js, Django, FastAPI, LangChain Backend & API: REST, WebSockets, Automated Testing (Cypress, Playwright) Tools & Processes: Git, Jira, CI/CD, VS Code Mobile Development: Android Other: Context API, Redux, Python Data Structures

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer – Dec 2024 – Present • Lead a four-engineer pod in an Agile setting, translating product requirements into technical epics and sprint tickets. • Delivered the “Sports Betting Simulator Engine” using React.js for the front end and FastAPI (Python) as the back-end microservice; enabled real-time odds calculation via WebSockets. • Integrated LangChain prompt pipelines to automate data processing for the Gen-Box LLM Integration project, bridging raw LLM capabilities with application-specific data. • Refactored monolithic flows in a large insurance module, improving state management and achieving Core Web Vitals thresholds (LCP 8 s → 2 s, INP 1500 ms → <100 ms). • Modernized testing architecture by adopting Playwright for new features while sustaining legacy Cypress suites. • Enforced >80% automated test coverage and conducted thorough code reviews to ensure deployment stability.

Software Engineer – Dec 2020 – Nov 2024 • Built cross-platform React Native interfaces for hospitality management, integrating with REST APIs and third-party auth services. • Developed secure, low-memory footprint Node.js API endpoints for enterprise learning integrations across Microsoft Teams, GSuite, and ServiceNow. • Designed responsive UI components in React.js, managing state with Redux and Context API to synchronize embedded widgets with parent applications.

Software Engineer Intern – May – Nov 2020 • Rapidly mastered modern frontend frameworks and best practices, leading to a full-time offer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing) • Implemented Android foreground services using Kotlin, Jetpack Compose, and Coroutines for continuous usage tracking.

Sports Betting Simulator Engine • Backend powered by FastAPI (Python) with WebSocket streams for live odds; integrated React.js front-end for user interaction.

Gen-Box LLM Integration • Spearheaded the use of LangChain to construct contextual prompt pipelines, automating data processing and query resolution.

EDUCATION Bachelor of Technology – Computer Science & Engineering (2020) Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow Diploma – Information Technology (BTEUP), Lucknow
