Vijay Kumar Srivastava

Senior Software Engineer – Technical Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Seasoned Senior Software Engineer with 5+ years of professional experience in full-stack development, leading cross-functional engineering pods to deliver scalable web and mobile products. Proficient in Python (Django) and JavaScript/TypeScript ecosystems (React, React Native, Node.js). Demonstrated ability to architect end-to-end solutions—from API design to UI implementation—while enforcing performance, quality, and CI/CD best practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python Frameworks/Libraries: React, React Native, Node.js, Django Mobile Platforms: Android (React Native) / Kotlin (limited exposure) DevOps & Tools: Git, Jira, CI/CD pipelines, Automated Testing (Cypress, Playwright), VS Code Databases: PostgreSQL / MySQL (via Django ORM)

PROFESSIONAL EXPERIENCE

Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | December 2024 – Present • Designed the front-end architecture for a new Insurance module, defining reusable component patterns and state management with React/Redux. • Built and maintained RESTful APIs in Django, ensuring secure authentication and efficient data access for mobile and web clients. • Led a 4-engineer pod, translating product requirements into technical epics, sprint tickets, and delivering incremental releases on schedule. • Implemented CI/CD pipelines with automated test suites (Cypress & Playwright) to achieve >80% coverage across all product iterations. • Optimized application performance: reduced Largest Contentful Paint from 8 s to 2 s and Interaction-to-Next-Paint from 1500 ms to <100 ms through state segregation and UI modularization.

Software Engineer | December 2020 – November 2024 Project: Enterprise Learning Integrations (NDA) • Delivered cross-platform React components for enterprise integrations with Microsoft Teams, GSuite, and ServiceNow, managing complex state across host applications. • Developed Node.js APIs to support lightweight integration workflows, minimizing memory footprint in host environments. Project: Cross-Platform Hospitality Management (NDA) • Created responsive mobile interfaces using React Native, translating detailed UX specifications into intuitive user flows. • Integrated front-end state with RESTful

back-ends and third-party authentication services, ensuring stable performance across device variants.

Software Engineer Intern | May 2020 – November 2020 • Gained proficiency in modern JavaScript frameworks and engineering best practices, leading to a full-time offer as Software Engineer.

KEY ARCHITECTURAL PROJECTS

MindFul Scrolling (Digital Wellbeing Application) • Built an Android application using Kotlin and Jetpack Compose; implemented background services for real-time app usage tracking and session management via Coroutines & Flows. Sports Betting Simulator Engine • Designed a high-throughput simulator with React.js front-end and FastAPI back-end, enabling live odds calculation and real-time data streaming through WebSockets. Gen-Box LLM Integration • Integrated Large Language Models using LangChain to automate data processing within Python services.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow – 2020 Diploma – Information Technology, Board of Technical Education Uttar Pradesh (BTEUP)
