Target Role: Senior Software Engineer – Tech Lead (AI Engineering Focus)

PROFESSIONAL SUMMARY Forward-thinking Senior Software Engineer with 5+ years of experience delivering end-to-end software solutions, including production AI and ML components. Recognized as Developer of the Quarter for pioneering frontend architecture and for driving high-impact performance refactors. Proven ability to bridge product vision with scalable technical implementation, resolve critical technical debt, and mentor engineering pods to elevate velocity and code quality.

TECHNICAL SKILLS Languages: Python, JavaScript (ES6+), TypeScript Frameworks / Libraries: React, React Native, Node.js, Django, FastAPI, LangChain, FastAPI, Playwright, Cypress, Redux, Context API AI & ML: LangChain pipelines, LLM integration, prompt engineering, vector search concepts (experience with semantic kernel concepts) DevOps & CI/CD: Git, Jira, CI/CD pipelines, automated testing (Cypress, Playwright), Docker (basic), Terraform (basic) Cloud: AWS, Azure, GCP (basic exposure via project deployments)

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | Dec 2024 – Present • Architected and released a greenfield Insurance module, establishing frontend architectural standards for a core business workflow. • Executed a critical performance refactor of a monolithic creation flow, separating global state from local form state to eliminate prop drilling and reduce DOM re-renders. • Achieved Core Web Vitals targets, cutting LCP from 8s to 2s and INP from 1500 ms to <100 ms. • Led a 4-engineer pod in an Agile setting, translating high-level product requirements into technical epics and sprint tickets, ensuring continuous velocity. • Enforced >80% automated test coverage across iterations, integrating Playwright into the testing architecture while maintaining legacy Cypress suites. • Conducted peer code reviews and performed AIO test validations for major releases.

Software Engineer | Dec 2020 – Nov 2024 • Delivered complex React.js UI components for cross-platform integration widgets (Microsoft Teams, GSuite, ServiceNow). • Implemented Redux + Context API for seamless data synchronization across embedded widgets and parent applications. • Developed optimized pure-functional components and Node.js APIs to reduce memory footprint. • Built responsive React Native interfaces for cross-platform hospitality management, integrating REST APIs and third-party authentication. • Debugged UI rendering issues and optimized component lifecycles for varied device dimensions.

Software Engineer Intern | May 2020 – Nov 2020 • Rapidly acquired proficiency in modern frontend frameworks and best practices, leading to a full-time offer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing Application) • Tech Stack: Kotlin, Jetpack Compose, Coroutines & Flows, Android System APIs • Implemented

Android Foreground Services and UsageStatsManager for low-latency foreground app tracking. • Built a resilient session management system with Kotlin Coroutines and Flows. • Designed an accessible UI with Jetpack Compose (Material 3), managing overlay permissions and local state persistence.

Sports Betting Simulator Engine • Tech Stack: React.js, FastAPI, Python, WebSockets • Developed a high-throughput betting simulator; backend built with FastAPI for live odds calculation and bankroll management. • Added real-time data streaming for immediate frontend state synchronization.

Gen-Box LLM Integration • Tech Stack: Python, LangChain, Generative AI APIs • Spearheaded LLM integration to automate data processing and complex query resolution. • Created contextual prompt pipelines with LangChain to bridge raw LLM capabilities with application data.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering – AKTU, Lucknow (2020) Diploma, Information Technology – BTEUP, Lucknow
