Vijay Kumar Srivastava Senior Software Engineer – Cloud Operations Analyst Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Seasoned engineer with over five years of experience leading cross-functional teams, coordinating Agile workflows, and managing Jira tickets for production releases. Proven ability to translate high-level requirements into actionable epics, manage change control processes, and report status to stakeholders in a cloud-native environment.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Tools & Platforms: Git, Jira, Confluence, CI/CD pipelines, automated testing (Cypress, Playwright) Frameworks: React, React Native, Node.js, Django

PROFESSIONAL EXPERIENCE

Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | December 2024 – Present - Lead a 4-engineer pod, ensuring delivery of production features and coordinating release activities. - Created Jira epics and detailed sprint tickets from product requirements, establishing clear scope and risk assessment for each change. - Coordinated release and change control activities; conducted AIO test validations across multiple product iterations, maintaining >80% automated coverage. - Produced status reports and run-book documentation to keep stakeholders informed and support cross-team collaboration. - Implemented Playwright testing framework to support regression suites during major production releases.

Software Engineer | December 2020 – November 2024 - Designed and delivered React.js components, translating parent application data into frontend state using Redux and Context API while maintaining high performance for enterprise deployments. - Managed backend Node.js APIs and performed integration testing, collaborating with product owners to document requirements in Jira. - Participated in PI Planning and Scrum ceremonies, driving team velocity and facilitating backlog grooming.

Software Engineer Intern | May 2020 – November 2020 - Rapidly adopted modern frontend frameworks and engineering best practices; contributed to early sprint tasks and documented issues in Jira.

KEY PROJECTS (selected) - Enterprise Building Management System: Greenfield Insurance module architecture; coordinated cross-team integration and change management. - Cross-Platform Hospitality Management: Developed mobile interfaces, integrated REST APIs, and managed feature delivery through Jira tickets.

EDUCATION Bachelor of Technology – Computer Science & Engineering, 2020 – Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow
