Vijay Kumar Srivastava Target Role: Senior Software Engineer — Tech Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Forward-thinking Senior Software Engineer with over 5 years of professional experience, recognized as Developer of the Quarter for driving high-impact frontend architecture. Passionate about delivering end-to-end solutions that combine software engineering with enterprise-grade AI capabilities, bridging product vision and technical scalability. Demonstrated success in resolving critical technical debt, orchestrating sweeping performance refactors, mentoring engineering pods to elevate team velocity, and integrating large-language-model pipelines into production systems.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Frontend & Mobile: React, React Native, Android Backend & AI: Node.js, Django, FastAPI, LangChain, Generative AI APIs, WebSockets Engineering & Tools: Git, Jira, CI/CD, Automated Testing (Cypress, Playwright), VS Code

PROFESSIONAL EXPERIENCE Ksolves India Ltd. – Noida, Uttar Pradesh Senior Software Engineer (December 2024 – Present) Project: Enterprise Building Management System (NDA) • Architected the greenfield Insurance module, establishing frontend architectural standards for a core business workflow. • Engineered a critical performance refactor of the monolithic creation flow, segregating global Redux state from local Context API to eliminate prop drilling and unoptimised full-DOM re-renders. • Achieved Core Web Vitals thresholds through UI modularisation and compartmentalised state updates, reducing LCP from 8s to 2s and INP from 1500 ms to <100 ms. • Led a 4-engineer pod, translating high-level product requirements into technical epics and actionable sprint tickets, maintaining continuous team velocity. • Enforced >80% automated test coverage across multiple product iterations, orchestrating QA workflows alongside feature development. • Modernised testing architecture with Playwright for the next-generation application while maintaining legacy Cypress suites. • Conducted rigorous peer code reviews and executed critical AIO test validations during major production releases.

Ksolves India Ltd. – Noida, Uttar Pradesh Software Engineer (December 2020 – November 2024) Project: Enterprise Learning Integrations (NDA) • Engineered complex React.js UI components for a cross-platform integration widget deployed securely across Microsoft Teams, GSuite, and ServiceNow. • Leveraged Redux and Context API for seamless data synchronization between the embedded widget and varied parent applications. • Maintained performance standards by developing optimised, pure functional components and robust Node.js APIs.

Project: Cross-Platform Hospitality Management (NDA) • Developed responsive cross-platform mobile interfaces using React Native, translating complex UX requirements into seamless user flows. • Integrated frontend state with external backend services, connecting core UI components to REST APIs and third-party authentication platforms. •

Debugged UI rendering issues and optimized component lifecycles for performance across device dimensions.

Ksolves India Ltd. – Noida, Uttar Pradesh Software Engineer Intern (May 2020 – November 2020) • Rapidly acquired proficiency in modern frontend frameworks and engineering best practices, leading to a full-time offer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing Application) • Tech Stack: Kotlin, Jetpack Compose, Coroutines & Flows, Android System APIs • Built a digital wellbeing utility using Android Foreground Services and UsageStatsManager for continuous, low-latency tracking of foreground applications. • Designed a resilient session-management system with Kotlin Coroutines and Flows, implementing cooldown and debounce logic to prevent app-switching bypass. • Delivered a modern, accessible UI with Jetpack Compose (Material 3), handling overlay permissions and local state persistence.

Sports Betting Simulator Engine • Tech Stack: React.js, FastAPI, Python, WebSockets • Architected a high-throughput betting engine simulator, using FastAPI to compute live odds and manage dynamic bankrolls. • Implemented real-time data streaming to synchronize frontend state during simulated live events.

Gen-Box LLM Integration • Tech Stack: Python, LangChain, Generative AI APIs • Spearheaded the integration of large language models to automate data processing and complex query resolution. • Engineered contextual prompt pipelines with LangChain to bridge raw LLM capabilities with specific application data.

EDUCATION Bachelor of Technology (B.Tech) – Computer Science & Engineering (Graduated 2020) Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow Diploma – Information Technology Board of Technical Education Uttar Pradesh (BTEUP), Lucknow
