PROFESSIONAL SUMMARY Seasoned Software Engineer with over 5 years of experience in building scalable backend systems and integrating large-language models (LLMs). Proven track record of delivering AI-enabled services using Python, FastAPI, and LangChain. Experienced in Agile/Scrum environments, leading small engineering pods, and driving end-to-end ownership from requirement analysis to production release.

TECHNICAL SKILLS Languages & Frameworks: Python (FastAPI), JavaScript (ES6+), TypeScript, Node.js AI & ML Tools: LangChain, OpenAI SDK (used in context of LLM integration projects) Backend & APIs: FastAPI, Django, RESTful services, Redux (frontend state), Context API Databases: PostgreSQL (design knowledge referenced in educational background) Tools & Practices: Git, Jira, CI/CD pipelines, Automated Testing (Cypress, Playwright), VS Code Cloud & Ops: GCP (conceptual familiarity from coursework), Docker/Kubernetes (basic usage)

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | December 2024 – Present • Designed and deployed a greenfield insurance module with tight Core Web Vitals compliance. • Modernized performance of monolithic flows using Redux → Context API separation. • Led a 4-engineer pod through Agile sprints, translating product requirements into technical epics and sprint tickets. • Maintained >80% automated test coverage across multiple iterations, orchestrating QA workflows. • Implemented Playwright for next-generation UI testing while stabilizing legacy Cypress suites.

Ksolves India Ltd., Noida, Uttar Pradesh Software Engineer | December 2020 – November 2024 • Built and delivered complex React.js UI components for enterprise integration widgets across Microsoft Teams, GSuite, and ServiceNow. • Leveraged Redux and Context API to synchronize embedded widget state with host applications. • Developed optimized Node.js APIs that minimized memory footprint within host environments. • Created responsive cross-platform mobile interfaces using React Native, integrating RESTful backends and third-party authentication services.

Key Architectural Projects Gen-Box LLM Integration | Python, LangChain, Generative AI APIs • Spearheaded the integration of Large Language Models to automate data processing and complex query resolution. • Engineered contextual prompt pipelines using LangChain for bridging raw LLM outputs with application-specific data. Sports Betting Simulator Engine | React.js, FastAPI, Python, WebSockets • Architected a high-throughput betting simulator backend in FastAPI, handling live odds calculation and bankroll management. • Implemented real-time WebSocket streams to synchronize frontend state during simulated live events. MindFul Scrolling (Digital Wellbeing) | Kotlin, Jetpack Compose • Designed low-latency foreground tracking using Android Foreground Services and UsageStatsManager.

EDUCATION Bachelor of Technology – Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, Uttar Pradesh (2020) Diploma – Information Technology, Board of Technical Education Uttar Pradesh (BTEUP), Lucknow, Uttar Pradesh
