Vijay Kumar Srivastava Senior AI Engineer – Tech Lead (Target Role) Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Forward-thinking Senior Software Engineer with over 5 years of professional experience in building and scaling software systems. Demonstrated success in integrating large language models (LLM) into production applications using LangChain, developing high-throughput backend services with FastAPI, and applying Python to create robust AI solutions. Experienced in Agile product development, CI/CD automation, automated testing, and leading small engineering pods to deliver quality code on schedule.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Frameworks & Libraries: React, React Native, Node.js, Django, FastAPI, LangChain, Cypress, Playwright Databases: – Cloud Platforms: – Containerization / Orchestration: – MLOps & CI/CD: Git, Jira, CI/CD pipelines, automated test coverage >80%

PROFESSIONAL EXPERIENCE Ksolves India Ltd. | Noida, Uttar Pradesh Senior Software Engineer (December 2024 – Present) • Architected a greenfield Insurance module in a cross-functional team, defining frontend architectural standards. • Led a 4-engineer pod in an Agile setting, translating product requirements into technical epics and sprint tickets to maintain continuous velocity. • Implemented a critical performance refactor of the monolithic creation flow by separating Redux state from local Context API, eliminating prop drilling and reducing full-DOM re-renders. • Achieved strict Core Web Vitals thresholds: LCP 8s → 2s, INP 1500ms → <100ms through UI modularization and state compartmentalization. • Enforced >80% automated test coverage across multiple product iterations and coordinated QA workflows alongside feature development. • Modernized the testing architecture by adopting Playwright for next-generation application tests while maintaining legacy Cypress suites.

Software Engineer (December 2020 – November 2024) • Delivered complex React.js UI components for a cross-platform integration widget deployed across Microsoft Teams, GSuite, and ServiceNow. • Leveraged Redux and Context API for seamless data synchronization between embedded widgets and host applications. • Developed optimized, pure functional components and Node.js APIs to minimize memory footprint in enterprise environments. • Built responsive React Native interfaces for a hospitality management solution, integrating RESTful backend services and third-party authentication.

Software Engineer Intern (May 2020 – November 2020) • Rapidly acquired proficiency in modern frontend frameworks and engineering best practices, leading to a full-time offer as a Software Engineer.

KEY ARCHITECTURAL PROJECTS Sports Betting Simulator Engine • Developed a real-time betting engine simulator with Python FastAPI backend handling live odds calculation and dynamic bankroll management. • Designed WebSocket communication for immediate frontend state synchronization during simulated live events. Gen-Box LLM

Integration • Spearheaded integration of large language models to automate data processing and complex query resolution. • Engineered contextual prompt pipelines using LangChain to bridge raw LLM capabilities with specific application data requirements. MindFul Scrolling (Digital Wellbeing Application) • Built Android application using Kotlin, Jetpack Compose, Coroutines & Flows, focusing on foreground services and UsageStatsManager for low-latency tracking.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering – Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, 2020 Diploma, Information Technology – Board of Technical Education Uttar Pradesh (BTEUP), Lucknow
