Vijay Kumar Srivastava Senior Frontend Engineer – Taazaa Tech Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Seasoned Senior Software Engineer with over five years of hands-on experience delivering high-performance, scalable web applications using React.js, TypeScript, and Redux. Adept at leading cross-functional teams in an Agile environment, driving code quality through rigorous reviews, automated testing (Cypress, Playwright), and CI/CD pipelines. Proven track record of mentoring junior developers, refactoring legacy code for optimal Core Web Vitals, and integrating RESTful APIs to meet business requirements.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Frontend Frameworks: React.js, Redux, Context API Backend & APIs: Node.js, Django, RESTful services Engineering & Tools: Git, Jira, CI/CD pipelines, Automated Testing (Cypress, Playwright), VS Code, NPM/Yarn

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | December 2024 – Present - Designed and implemented a greenfield Insurance module using React.js with TypeScript, establishing architectural standards for enterprise workflows. - Performed a critical performance refactor of the monolith creation flow: segregated global Redux state from local Context API, eliminating prop drilling and reducing LCP from 8 s to 2 s and INP from 1500 ms to <100 ms. - Led a four-engineer pod in an Agile Scrum setting; translated product requirements into technical epics, sprint tickets, and conducted regular code reviews. - Enforced >80% automated test coverage across multiple releases, integrating Cypress suites for legacy features while migrating the new codebase to Playwright. - Coordinated CI/CD pipelines to maintain deployment stability and performed AIO test validations during major production rollouts.

Software Engineer | December 2020 – November 2024 - Built reusable React.js UI components for cross-platform integration widgets (Microsoft Teams, GSuite, ServiceNow) with seamless Redux-based state synchronization. - Developed RESTful API connectors in Node.js to integrate external backend services and third-party authentication platforms. - Optimized component lifecycles and pure functional patterns to minimize memory footprint across host environments. - Delivered a responsive React Native mobile interface for hospitality management, ensuring UI stability on varied device dimensions.

Software Engineer Intern | May 2020 – November 2020 - Rapidly acquired proficiency in modern frontend frameworks, leading to full-time offer as Software Engineer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing App) - Implemented Android foreground services and UsageStatsManager for continuous low-latency tracking; engineered resilient session management using Kotlin Coroutines and Flows. Sports Betting Simulator Engine - Developed a high-throughput simulator with React.js frontend, FastAPI backend handling live odds calculation, and WebSocket

streaming for real-time state sync. Gen-Box LLM Integration - Integrated Large Language Models via LangChain to automate data processing and contextual prompt pipelines.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering – Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, 2020 Diploma in Information Technology – Board of Technical Education Uttar Pradesh (BTEUP)
