Vijay Kumar Srivastava Senior Software Engineer – Tech Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Forward-thinking Senior Software Engineer with 5+ years of professional experience, recognised as Developer of the Quarter for driving high-impact frontend architecture. Proven track record in leading cross-functional engineering pods, translating complex product requirements into robust technical solutions, and delivering enterprise-grade systems. Extensive experience designing and scaling large-scale, production-grade AI-powered modules, including LLM integration, real-time streaming, and complex state management. Strong communicator adept at partnering with product, business, and executive stakeholders to shape AI strategy and drive measurable business impact.

TECHNICAL SKILLS Languages: Python, TypeScript, JavaScript (ES6+) AI & ML: LangChain, Generative AI APIs (OpenAI/Anthropic), FastAPI, WebSockets Frameworks: React, React Native, Django, Node.js Databases & Search: Vector databases (generic), SQL DevOps: Git, Jira, CI/CD, Docker, Kubernetes (basic exposure), Terraform (basic exposure) Testing: Cypress, Playwright, automated testing

PROFESSIONAL EXPERIENCE

Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer (Dec 2024 – Present) • Architected a greenfield insurance module, establishing frontend architectural standards for a core enterprise workflow. • Spearheaded a performance refactor, separating global Redux state from local form state via Context API, reducing LCP from 8s to 2s and INP from 1500 ms to <100 ms. • Led a 4-engineer pod as Agile technical lead, translating product requirements into epics and sprint tickets, driving continuous velocity. • Enforced >80% automated test coverage across multiple product iterations, coordinating QA and feature development. • Modernised testing architecture by implementing Playwright, while maintaining legacy Cypress suites. • Conducted rigorous peer code reviews and executed critical AIO test validations during major releases.

Software Engineer (Dec 2020 – Nov 2024) • Delivered complex React.js UI components for cross-platform integration widgets deployed in Microsoft Teams, GSuite, and ServiceNow. • Implemented advanced state management with Redux and Context API, synchronising data between embedded widgets and host applications. • Optimised React components and Node.js APIs to minimise memory footprint within host environments. • Built responsive cross-platform mobile interfaces with React Native, integrating frontend state with REST APIs and third-party auth. • Debugged UI rendering issues and optimised component lifecycles for consistent performance across device dimensions.

Software Engineer Intern (May 2020 – Nov 2020) • Rapidly acquired proficiency in modern frontend frameworks and engineering best practices, leading to a full-time offer.

KEY AI & ML PROJECTS Gen-Box LLM Integration • Integrated Large Language Models into enterprise workflows, automating data processing and complex query resolution. • Designed contextual prompt pipelines using LangChain, bridging raw LLM capabilities with application data.

Sports Betting Simulator Engine • Developed a high-throughput betting engine simulator using FastAPI and WebSockets, enabling real-time odds calculation and bankroll management. • Implemented real-time data streaming to synchronize frontend state during simulated live events.

Education Bachelor of Technology (B.Tech) – Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU), 2020 Diploma – Information Technology, Board of Technical Education Uttar Pradesh (BTEUP), 2020
