Vijay Kumar Srivastava Target Role: Senior Software Engineer — Tech Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Forward-thinking Senior Software Engineer with over 5 years of professional experience and recognized as Developer of the Quarter for driving high-impact frontend architecture. Experienced in leading Agile teams, architecting greenfield modules, performing performance refactors, and integrating complex enterprise systems—including deployments to Microsoft Teams, GSuite, and ServiceNow—while ensuring best practices, scalability, and code quality.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Front-end & Mobile: React, React Native, Android Back-end: Node.js, Django Integration & APIs: REST/SOAP API integration, middleware Engineering & Tools: Git, Jira, CI/CD, Automated Testing (Cypress, Playwright), VS Code

PROFESSIONAL EXPERIENCE

Ksolves India Ltd. Senior Software Engineer | December 2024 – Present - Architected a greenfield Insurance module from concept to production release, establishing frontend architectural standards for core business workflows. - Executed critical performance refactor of monolithic creation flow, segregating global Redux data from local form state (Context API), eliminating prop drilling and reducing full-DOM re-renders. - Achieved Core Web Vitals thresholds: LCP 8s → 2s; INP 1500ms → <100ms through UI modularization and compartmentalized state updates. - Led a 4-engineer Agile pod, translating product requirements into technical epics and sprint tickets to maintain continuous team velocity. - Enforced >80% automated test coverage across iterations, coordinating QA workflows alongside feature development. - Modernized testing architecture by implementing Playwright while maintaining legacy Cypress suites for legacy components. - Conducted rigorous peer code reviews and executed AIO test validations during major releases to ensure engineering standards.

Software Engineer | December 2020 – November 2024 Project: Enterprise Learning Integrations (NDA) - Engineered complex React.js UI components for a cross-platform integration widget deployed securely across Microsoft Teams, GSuite, and ServiceNow. - Implemented advanced state management using Redux and Context API to synchronize data between embedded widgets and parent applications. - Maintained performance standards via optimized pure functional components and Node.js APIs, minimizing memory footprint within host environments.

Project: Cross-Platform Hospitality Management (NDA) - Developed responsive cross-platform mobile interfaces using React Native; translated complex UX requirements into seamless user flows for patrons and staff. - Integrated application state with external REST APIs and third-party authentication platforms. - Debugged UI rendering issues, optimized component lifecycles to sustain performance across device dimensions.

Software Engineer Intern | May 2020 – November 2020 - Acquired proficiency in modern frontend frameworks and engineering best practices; led to a full-time offer as Software Engineer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing Application) – Built using Kotlin, Jetpack Compose, Coroutines & Flows, Android System APIs. – Implemented Android Foreground Services and UsageStatsManager for continuous low-latency tracking of foreground applications. – Designed resilient session management with coroutines and flows to enforce screen time limits.

Sports Betting Simulator Engine – React.js frontend with FastAPI backend; handled live odds calculation and bankroll management via WebSockets.

Gen-Box LLM Integration – Integrated Large Language Models using Python, LangChain, generative AI APIs for automated data processing.

EDUCATION Bachelor of Technology (B.Tech) – Computer Science & Engineering, 2020 Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Diploma – Information Technology Board of Technical Education Uttar Pradesh (BTEUP)
