Vijay Kumar Srivastava Senior Distributed Systems Lead – Globallogic Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Software engineer with more than five years of professional experience, specializing in high-performance distributed applications and backend system design. Proven track record delivering scalable Python/Node.js services, optimizing runtime performance, and leading cross-functional engineering pods to rapid delivery and high code quality.

KEY SKILLS Languages & Frameworks: Python (FastAPI), JavaScript (ES6+), TypeScript, Node.js, Django Backend Architecture: RESTful APIs, WebSockets, state segregation for performance, CI/CD pipelines Performance Optimization: Core Web Vitals improvements, modular UI architecture, automated test coverage Tools & Practices: Git, Jira, Automated Testing (Cypress, Playwright), VS Code

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida Senior Software Engineer (Dec 2024 – Present) • Designed and released a greenfield insurance module with Python/Node.js backend, ensuring modularity for future scalability. • Refactored monolithic flow using context-based state separation; reduced Largest Contentful Paint from 8 s to 2 s and Interaction to Next Paint from 1500 ms to <100 ms. • Directed a 4-engineer pod, translating product vision into technical epics and sprint tickets, maintaining >80% automated test coverage. • Modernized testing suite with Playwright while preserving legacy Cypress workflows.

Software Engineer (Dec 2020 – Nov 2024) • Built a React.js integration widget deployed across Microsoft Teams, GSuite, and ServiceNow; leveraged Redux and Context API for state sync. • Developed responsive cross-platform mobile interfaces in React Native, integrating REST APIs and third-party auth services. • Maintained performance of Node.js APIs, ensuring minimal memory footprint in host environments.

Software Engineer Intern (May 2020 – Nov 2020) • Acquired proficiency in modern frontend frameworks; secured full-time role.

KEY ARCHITECTURAL PROJECTS Sports Betting Simulator Engine – Python (FastAPI) & React.js • Implemented a real-time betting simulator backend with FastAPI, handling live odds calculation and bankroll management. • Developed WebSocket streams for instantaneous UI state synchronization across simulated events.

Gen-Box LLM Integration – Python & LangChain • Integrated large language models to automate data processing using contextual prompt pipelines.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering – Dr. A.P.J. Abdul Kalam Technical University, 2020 Diploma, Information Technology – Board of Technical Education Uttar Pradesh
