Senior Software Engineer – Thales (Noida)

PROFESSIONAL SUMMARY Senior Software Engineer with over 5 years of professional experience specializing in full-stack web and micro-service development. Proven track record in designing scalable front-end architectures, building robust APIs, and automating end-to-end test suites to validate functional and performance requirements. Adept at leading cross-functional engineering pods within Agile environments, translating business stories into technical epics and ensuring high code quality through rigorous peer review and automated coverage.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Front-End & Mobile: React, React Native, Android (Kotlin) Back-End: Node.js, Django Testing & Automation: Cypress, Playwright, Jest, Selenium WebDriver (knowledge) CI/CD & Tools: Git, Jira, generic CI pipelines, automated test coverage analysis Other: REST APIs, GraphQL, HTML/CSS, JSON, Docker

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida, Uttar Pradesh Senior Software Engineer | Dec 2024 – Present • Architected a greenfield insurance module for an enterprise building management system, establishing front-end standards and delivering production-ready code. • Executed a critical performance refactor of the creation flow, moving global Redux state to local Context API to eliminate unnecessary re-renders and reduce LCP from 8 s to 2 s. • Maintained >80% automated test coverage across multiple product iterations, leveraging Cypress and Playwright for UI regression, while stabilizing legacy Cypress suites. • Led a four-engineer pod in an Agile setting: translated high-level requirements into technical epics, defined sprint tasks, and ensured continuous velocity. • Modernized the testing architecture by implementing Playwright for next-generation application tests and coordinating QA workflows.

Software Engineer | Dec 2020 – Nov 2024 Enterprise Learning Integrations (NDA) • Delivered complex React.js UI components integrated with Microsoft Teams, GSuite, and ServiceNow, ensuring seamless data sync across parent applications using Redux and Context API. • Developed optimized Node.js APIs to minimize memory footprint within host environments. Cross-Platform Hospitality Management (NDA) • Built responsive mobile interfaces in React Native; connected front-end state to REST APIs and third-party authentication services. • Debugged rendering issues and optimized component lifecycles for consistent performance across device sizes.

Software Engineer Intern | May 2020 – Nov 2020 Acquired proficiency in modern front-end frameworks, leading to a full-time offer.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing App) • Developed Android app using Kotlin and Jetpack Compose; implemented foreground services and UsageStatsManager for real-time usage tracking. Sports Betting Simulator Engine • Built React.js front-end with FastAPI back-end, enabling live odds calculation via WebSockets. Gen-Box LLM Integration • Integrated LangChain with Python to automate data processing using large language models.

EDUCATION Bachelor of Technology (B.Tech) – Computer Science & Engineering | Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, 2020 Diploma – Information Technology | Board of Technical Education Uttar Pradesh (BTEUP)
