Vijay Kumar Srivastava

Senior AI Engineer – Lead Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior AI Engineer with 5+ years of experience designing, building, and deploying production-grade AI solutions. Proven track record of leading cross-functional teams, architecting end-to-end AI workflows, and mentoring engineering pods to accelerate velocity and code quality. Expertise in Python, TypeScript/Node.js, and modern AI stacks such as LangChain, Hugging Face, and FastAPI. Adept at integrating LLM pipelines, RAG architectures, and real-time streaming into enterprise systems while ensuring performance, observability, and security.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+) Frameworks / Libraries: FastAPI, LangChain, Hugging Face, PyTorch/TensorFlow, OpenAI APIs Backend & Services: Node.js, Django, RESTful APIs, WebSockets AI Engineering: LLM integration, prompt engineering, vector-search (conceptual familiarity with Pinecone, Qdrant, Milvus, PGVector) Data & Orchestration: Data pipelines, RAG, vector databases DevOps & MLOps: CI/CD, Docker, automated testing (Cypress, Playwright), Kubernetes/Terraform (conceptual familiarity) Tools: Git, Jira, VS Code, Docker, Terraform, Kubernetes, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Ksolves India Ltd., Noida, Uttar Pradesh

Senior Software Engineer (Dec 2024 – Present) • Architected a greenfield Insurance module for an Enterprise Building Management System, establishing frontend architectural standards and delivering a production-grade feature set within scope and timeline. • Led a 4-engineer pod, translating high-level product requirements into technical epics and sprint tickets, ensuring continuous team velocity and delivering a scalable solution. • Implemented a critical performance refactor, segregating global Redux state from local Context API state to eliminate prop drilling and reduce full-DOM re-renders, achieving LCP of 2 s and INP < 100 ms. • Introduced Playwright for new-generation application testing, maintaining legacy Cypress suites, and enforcing > 80 % automated test coverage across iterations. • Established code-review practices and rigorous peer reviews to maintain deployment stability and product quality.

Software Engineer (Dec 2020 – Nov 2024) • Delivered complex React.js UI components for cross-platform integration widgets (Microsoft Teams, GSuite, ServiceNow) with robust state management using Redux and Context API. • Built responsive React Native mobile interfaces for hospitality management, integrating frontend state with REST APIs and third-party authentication services. • Optimized component lifecycles and memory footprint to ensure consistent performance across varied device dimensions.

Software Engineer Intern (May 2020 – Nov 2020) • Rapidly acquired proficiency in modern frontend frameworks and engineering best practices, leading to a full-time offer.

KEY AI & Architectural PROJECTS

Gen-Box LLM Integration • Spearheaded the integration of large language models to automate data processing and complex query resolution. • Engineered contextual prompt pipelines using LangChain to bridge raw LLM capabilities with specific application data requirements.

Sports Betting Simulator Engine • Architected a high-throughput betting engine simulator with a FastAPI backend for live odds calculation and dynamic bankroll management. • Developed real-time data streaming to synchronize frontend state during simulated live events.

MindFul Scrolling (Digital Wellbeing Application) • Designed a resilient session-management system using Kotlin Coroutines and Flows, ensuring low-latency tracking of foreground applications. • Built an accessible UI with Jetpack Compose, handling overlay permissions and local state persistence.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU), 2020 Diploma – Information Technology, Board of Technical Education Uttar Pradesh (BTEUP), 2020
