Vijay Kumar Srivastava DevOps Engineer – GCP (Target Role: DevOps Engineer_GCP) Noida | +91-9807969454 | vijay.kr809@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY Seasoned software engineer with over 5 years of experience building and maintaining CI/CD pipelines, automating testing workflows, and managing source control using Git. Demonstrated ability to lead small engineering pods, enforce automated test coverage, and drive performance optimizations in enterprise applications. Seeking to transition skills to DevOps and cloud infrastructure roles focused on GCP and GitLab.

TECHNICAL SKILLS Languages: JavaScript (ES6+), TypeScript, Python Backend & Tools: Node.js, Django, Git, Jira, CI/CD (generic tools), Automated Testing (Cypress, Playwright) Platforms: Basic Linux shell scripting

PROFESSIONAL EXPERIENCE Ksolves India Ltd., Noida Senior Software Engineer | Dec 2024 – Present - Developed and maintained continuous integration pipelines for front-end and back-end components, ensuring automated build and test runs. - Implemented Git workflow strategies (feature branches, pull requests) to streamline code reviews and merge processes across a 4-engineer pod. - Enforced >80% automated test coverage using Cypress and Playwright, integrating results into CI dashboards. - Conducted peer code reviews and managed pipeline configuration for multiple production releases.

Ksolves India Ltd., Noida Software Engineer | Dec 2020 – Nov 2024 - Delivered React.js UI components with integrated unit tests; leveraged Git for version control and collaboration. - Managed state synchronization and performance optimizations, contributing to build stability and faster test cycles.

Ksolves India Ltd., Noida Software Engineer Intern | May 2020 – Nov 2020 - Gained proficiency in modern frontend frameworks and engineering best practices; contributed to repository management and CI setup for a small project.

KEY ARCHITECTURAL PROJECTS MindFul Scrolling (Digital Wellbeing Application) – Tech Stack: Kotlin, Jetpack Compose, Coroutines & Flows, Android System APIs – Engineered a reliable digital wellbeing utility utilizing Android Foreground Services and UsageStatsManager to execute continuous, low-latency tracking of active foreground applications. – Architected a resilient session management system using Kotlin Coroutines and Flows, implementing complex cooldown and debounce logic to prevent users from bypassing restrictions via app switching. – Designed a modern, accessible UI with Jetpack Compose (Material 3), securely handling system-level overlay permissions and local state persistence to dynamically enforce customized screen time limits.

Sports Betting Simulator Engine – Tech Stack: React.js, FastAPI, Python, WebSockets – Architected a high-throughput betting engine simulator, engineering the backend in FastAPI to handle live odds calculation and dynamic bankroll management. – Designed real-time

data streaming capabilities to ensure immediate frontend state synchronization across the React application during simulated live events.

Gen-Box LLM Integration – Tech Stack: Python, LangChain, Generative AI APIs – Spearheaded the integration of Large Language Models to automate data processing and complex query resolution. – Engineered contextual prompt pipelines using LangChain to bridge raw LLM capabilities with specific application data requirements.

EDUCATION Bachelor of Technology (B.Tech), Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU) – 2020 Diploma, Information Technology, Board of Technical Education Uttar Pradesh (BTEUP)
